VOLUME 41

CONTENTS

NUMBER 1

	i	ISE pages
E. Fontes, M. Fontes and D. Simonsson	1	Effects of different design parameters on the performance of MCFC cathodes
Y. Matsuo and T. Nakajima	15	Electrochemical properties of fluorinated fullerene C_{60}
C. Arbizzani, M. Mastragostino and L. Meneghello	21	Polymer-based redox supercapacitors: a comparative study
P. Ferloni, M. Mastragostino and L. Meneghello	27	Impedance analysis of electronically conducting polymers
A. Goossens, M. Vazquez and D. D. Macdonald	35	The nature of electronic states in anodic zirconium oxide films part 1: the potential distribution
A. Goossens, M. Vazquez and D. D. Macdonald	47	The nature of electronic states in anodic zirconium oxide films part 2: photoelectrochemical characterization
J.-D. Kim, S.-I. Pyun and R. A. Oriani	57	Effects of chloride ion and applied current density on the stress generation during anodic oxidation of tungsten in 0.1 M H_2SO_4 solution
M. Hepel	63	Composite polypyrrole films switchable between the anion- and cation-exchanger states
Yongcheng Liu, Haiying Liu, Jianghong Qian, Jiaqi Deng and Tongyin Yu	77	Feature of an amperometric ferrocyanide-mediating H_2O_2 sensor for organic-phase assay based on regenerated silk fibroin as immobilization matrix for peroxidase
C. Cachet, C. Rerolle and R. Wiart	83	Kinetics of Pb and Pb–Ag anodes for zinc electrowinning—II. Oxygen evolution at high polarization
M. C. Bernard, P. Bernard, M. Keddam, S. Senyarich and H. Takenouti	91	Characterisation of new nickel hydroxides during the transformation of α $Ni(OH)_2$ to β $Ni(OH)_2$ by ageing
P. M. Vereecken, F. V. Kerchove and W. P. Gomes	95	Electrochemical behaviour of (1 0 0) GaAs in copper(II)-containing solutions
E. A. Meulenkamp and A. R. de Wit	109	Suppression of hole injection from Ce^{4+} and $Fe(CN)_6^{3-}$ at *p*-Type semiconductors by illumination
C. Iwakura, T. Oura, H. Inoue and M. Matsuoka	117	Effects of substitution with foreign metals on the crystallographic, thermodynamic and electrochemical properties of AB_5-type hydrogen storage alloys
L. Sawtschenko, K. Jobst, A. Neudeck and L. Dunsch	123	Electrochemical and spectroelectrochemical studies of dihydrotetra-azapentacene as a model of polyazaacene
I. Pardo, M. Angulo, R. M. Galvín and J. M. R. Mellado	133	Electrochemical oxidation of 2-mercaptopyridine N-oxide on mercury electrodes in aqueous solutions
P. Claes, B. Thirion and J. Glibert	141	Solubility of CO_2 in the molten NA_2CO_3—K_2CO_3 (42 mol %) eutectic mixture at 800°C

D. SAZOU and C. GEORGOLIOS	147	Morphological surface changes of the Fe electrodissolution in 2 M H_2SO_4 during bursting oscillations induced by Br^-
H. G. HERTZ and S. K. RATKJE	159	Electrokinetic effects by the electric work method
E. BRENDLER, S. K. RATKJE and H. G. HERTZ	169	Streaming potentials of Nuclepore membranes by the electric work method
GUO DONG ZHENG, YAN YAN, SAI GAO, SHAN LING TONG, DE GAO and KAI JI ZHEN	177	The reaction mechanism of alkyl halides with carbon dioxide catalyzed by 5,10,15,20,-tetraphenyl porphyrin cobalt (CoTPP)
	183	Future Special Issues
	185	Papers in Press
	189	Electrochemical Calendar
	191	Books received
	I	Guide to Authors

NUMBER 2

	i	ISE pages
J.-T. WANG, R. F. SAVINELL, J. WAINRIGHT, M. LITT and H. YU	193	A H_2/O_2 fuel cell using acid doped polybenzimidazole as polymer electrolyte
M. Y. SAÏDI, J. BARKER and R. KOKSBANG	199	Structural and electrochemical investigation of lithium insertion in the $Li_{1-x}Mn_2O_4$ spinel phase
K. K. KASEM	205	Electrochemical behavior of sodium 12-tungstodicobaltoate in aqueous and mixed solvent electrolytes
T. F. OTERO and V. OLAZÁBAL	213	Electrogeneration of polypyrrole in presence of polyvinylsulphonate. Kinetic study
J.-H. YE and P. S. FEDKIW	221	Electrodeposition of high-surface area platinum in a well adherent nafion film on glassy carbon
U. SCHARF and E. W. GRABNER	233	Electrocatalytic oxidation of hydrazine at a prussian blue-modified glassy carbon electrode
M. ISHIBASHI, M. ITOH, H. NISHIHARA and K. ARAMAKI	241	Permeability of alkanethiol self-assembled monolayers adsorbed on copper electrodes to molecular oxygen dissolved in 0.5 M Na_2SO_4 solution
K. MIURA, A. YAMADA and M. TANAKA	249	Electric states of spinel $Li_xMn_2O_4$ as a cathode of the rechargeable battery
S. PREUSSER and U. STIMMING	257	The study and modification of oxide surfaces using focussed laser pulses
A. A. KAMNEV	267	The role of lithium in preventing the detrimental effect of iron on alkaline battery nickel hydroxide electrode: a mechanistic aspect
A. DURANT, H. FRANÇOIS, J. REISSE and A. KIRSCH-DEMESMAEKER	277	Sonoelectrochemistry: the effects of ultrasound on organic electrochemical reduction
A. A. MOYA and J. HORNO	285	Simulation of nonstationary diffusion-migration processes in electrochemical cells using the network method
M. M. GÓMEZ, A. AREVALILLO and J. M. VARA	291	Specific adsorption of potassium penicillin G on mercury electrode

J. SABA 297 Description of the mixed polyethyleneglycoles–thiourea adsorption layer on a mercury electrode and its effect on the electroreduction of zinc (II)

A. GAMEZ, D. RICHARD, P. GALLEZOT, F. GLOAGUEN, R. FAURE and R. DURAND 307 Oxygen reduction on well-defined platinum nanoparticles inside recast ionomer

R. G. COMPTON, J. C. EKLUND, F. MARKEN and D. N. WALLER 315 Electrode processes at the surfaces of sonotrodes

Y. YANG, X. G. CHEN and Z. G. LIN 321 Distribution and laser-induced behavior of lead monooxide on lead electrodes in acid solution

E. MICHAILOVA, A. MILCHEV and R. LACMANN 329 Electrochemical growth of single metal and alloy clusters—III. Potentiostatic conditions: experimental

E. T. HAYES, B. K. BELLINGHAM, H. B. MARK, JR and A. GALAL 337 An amperometric aqueous ethanol sensor based on the electrocatalytic oxidation at a cobalt–nickel oxide electrode

Short Communication

H. TSUTSUMI, H. DOI and T. OISHI 345 Conductivity enhancement of polymer gel containing surfactant

349 Future Special Issues

351 Papers in Press

353 Electrochemical Calendar

357 Books received

NUMBER 3

i ISE pages

P. MANOLATOS and M. JEROME 359 A thin palladium coating on iron for hydrogen permeation studies

T. TJÄRNHAGE, B. SKÅRMAN, B. LINDHOLM-SETHSON and M. SHARP 367 Electrochemical quartz crystal microbalance studies of thin poly(4-vinylpyridine) films containing $IrCl_6^{2-/3-}$ redox sites

P. PARMANANDA 377 Controlling chaos in a model for an electrochemical oscillator using a map-based algorithm

GUANGLI CHE and SHAOJUN DONG 381 Kinetics of electrocatalytic ascorbic acid at ultramicroelectrode modified by Eastman–AQ polymer containing tris(2,2′-bipyridine) osmium(III/II) complexes as electron-transfer centers

H. G. ZHANG, J. A. DOYLE, C. C. KENNA, S. R. LA BROOY, G. T. HEFTER and I. M. RITCHIE 389 A kinetic and electrochemical study of the cementation of gold onto mild steel from acidic thiourea solutions

N. GIORDANO, P. STAITI, S. HOCEVAR and A. S. ARICÒ 397 High performance fuel cell based on phosphotungstic acid as proton conducting electrolyte

T. LOUČKA and P. JANOŠ 405 Adsorption and oxidation of thiocyanate on a platinum electrode

K. E. HEUSLER 411 Multicomponent electrodes

O. R. CAMARA and S. TRASATTI 419 Surface electrochemical properties of $Ti/(RuO_2 + ZrO_2)$ electrodes

A. SRHIRI, M. ETMAN and F. DABOSI 429 Electro and physicochemical study of corrosion inhibition of carbon steel in 3% NaCl by alkylimidazoles

Y. Yamamoto, M. Matsuoka, M. Kimoto, M. Uemura and C. Iwakura	439	Potentiodynamic reactivation of a passivated lead negative electrode in sulphuric acid solution
L. P. Lossius and F. Emmenegger	445	Plating of magnesium from organic solvents
A. D. Jannakoudakis, P. D. Jannakoudakis, N. Pagalos, E. Theodoridou and J. O. Besenhard	449	Preparation and behaviour of acetylene black press-electrodes as adsorbents and metal catalysts supports
C. A. Gervasi, J. R. Vilche and P. E. Alvarez	455	A transition in the kinetics of electroreduction of anodically formed cobalt oxides. Influence of potentiostatic ageing
V. L. Cherginets, E. G. Khailova and O. V. Demirskaya	463	On the solubilities of metal oxides in ionic melt 2 CsBr · KBr at 700°C
Short Communications		
V. Jouikov and L. Grigorieva	469	Electrochemically induced silylation of unsaturated compounds
C. Iwakura, S. Hazui and H. Inoue	471	Effect of temperature on electrochemical characteristics of Mg_2Ni alloy
O. Enea	473	A porous cell for photo-assisted electro-oxidations in the gas-phase
	477	Future Special Issues
	479	Papers in Press
	481	Electrochemical Calendar
	485	Books Received

NUMBER 4

	i	ISE pages
K. Scott	487	Editorial
S. Donnelly, J. Grimshaw and J. Trocha-Grimshaw	489	Cyclizations. Part 3. Use of a mild-steel cathode in the electrochemical intramolecular cyclization of aryl halides
P. Trinidad and F. C. Walsh	493	Hydrodynamic behaviour of the FM01-LC reactor
E. Heitz	503	Mechanistically based prevention strategies of flow-induced corrosion
C. Ehrenbeck and K. Jüttner	511	Development of an anion/cation permeable free-standing membrane based on electrochemical switching of polypyrrole
T. Doherty, J. G. Sunderland, E. P. L. Roberts and D. J. Pickett	519	An improved model of potential and current distribution within a flow-through porous electrode
S. M. Kulikov, V. P. Plekhanov, A. I. Tsyganok, C. Schlimm and E. Heitz	527	Electrochemical reductive dechlorination of chlororganic compounds on carbon cloth and metal-modified carbon cloth cathodes
C. Ponce de Leon and D. Pletcher	533	The removal of Pb(II) from aqueous solutions using a reticulated vitreous carbon cathode cell—the influence of the electrolyte medium
W. M. Taama, R. E. Plimley and K. Scott	543	Mass transfer rates in a DEM electrochemical cell

W. M. Taama, R. E. Plimley and K. Scott	549	Influence of supporting electrolyte on ferricyanide reduction at a rotating disc electrode
J. Jörissen	553	Ion exchange membranes as solid polymer electrolytes (*spe*) in electro-organic syntheses without supporting electrolytes
I. Cservenyák, G. H. Kelsall and W. Wang	563	Reduction of Ti^{IV} species in aqueous sulfuric and hydrochloric acids I. Titanium speciation
I. Cservenyák, G. H. Kelsall and W. Wang	573	Reduction of Ti^{IV} species in aqueous hydrochloric and sulfuric acids II. ECE model of the behaviour in sulfate media
K. Bouzek, J. Palmer, I. Rousar and A. A. Wragg	583	Mass transfer to wall electrodes in a fluidised bed of inert particles
T. R. Ralph, M. L. Hitchman, J. P. Millington and F. C. Walsh	591	Mass transport in an electrochemical laboratory filterpress reactor and its enhancement by turbulence promoters
D. R. Hodgson	605	Application of electrochemical noise and *in situ* microscopy to the study of bubble evolution on chlorine evolving anodes
	611	Future Special Issues

SPECIAL ISSUE

INFRARED SPECTROSCOPY IN ELECTROCHEMISTRY

	i	ISE pages
T. Iwasita	621	Editorial
D. K. Lambert	623	Vibrational Stark effect of adsorbates at electrochemical interfaces
F. C. Nart and T. Iwasita	631	Static field effect on the band intensity of adsorbed sulfate ions
A. E. Russell, L. Rubasingham, P. L. Hagans and T. H. Ballinger	637	Cell and optics design for *in situ* far-infrared spectroscopy of electrode surfaces
N. S. Marinković, M. Hecht, J. S. Loring and W. R. Fawcett	641	A SNIFTIRS study of the diffuse double layer at single crystal platinum electrodes in acetonitrile
M. Weber and F. C. Nart	653	On the adsorption of ionic phosphate species on Au(111)—an *in situ* FTIR study
I. Villegas and M. J. Weaver	661	Progressive cation solvation at Pt(111) model electrochemical interfaces in ultrahigh vacuum as probed by infrared spectroscopy and work-function measurements
J. Rappich and H. J. Lewerenz	675	*In situ* FTIR investigation of the electrochemical microstructuring of *n*-Si(111)
M. Nakamura, M.-B. Song and M. Ito	681	Etching processing of Si(111) and Si(100) surfaces in an ammonium fluoride solution investigated by *in situ* ATR–IR
F. Ozanam, A. Djebri and J.-N. Chazalviel	687	The hydrogenated silicon surface in organic electrolytes probed through *in situ ir* spectroscopy in the ATR geometry

SHI-GANG SUN and YAN LIN	693	*In situ* FTIR spectroscopic investigations of reaction mechanism of isopropanol oxidation on platinum single crystal electrodes
B. BEDEN, F. LARGEAUD, K. B. KOKOH and C. LAMY	701	Fourier transform infrared reflectance spectroscopic investigation of the electrocatalytic oxidation of D-glucose: identification of reactive intermediates and reaction products
X. H. XIA, T. IWASITA, F. GE and W. VIELSTICH	711	Structural effects and reactivity in methanol oxidation on polycrystalline and single crystal platinum
K. SHAW, P. CHRISTENSEN and A. HAMNETT	719	Photoelectrochemical oxidation of organics on single-crystal TiO_2: an *in situ* FTIR study
A. RODES, R. GÓMEZ, J. M. PÉREZ, J. M. FELIU and A. ALDAZ	729	On the voltammetric and spectroscopic characterization of nitric oxide adlayers formed from nitrous acid on Pt(h,k,l) and Rh(h,k,l) electrodes
D. AURBACH, O. CHUSID, I. WEISSMAN and P. DAN	747	$LiC(SO_2CF_3)_3$, a new salt for Li battery systems. A comparative study of Li and non-active metal electrodes in its ethereal solutions using *in situ* FTIR spectroscopy
A. ARAMATA, S. TERUI, S. TAGUCHI, T. KAWAGUCHI and K. SHIMAZU	761	Underpotential deposition of zinc ions on polycrystalline platinum: FTIR and EQCM study
Z. PING, H. NEUGEBAUER and A. NECKEL	767	FTIR ATR spectroelectrochemical investigations of polyaniline with perrhenate as a new doping system
	773	Future Special Issues
	775	Papers in Press
	777	Electrochemical Calendar
	781	Books Received

NUMBER 6

	i	ISE pages
E. SIKORA, J. SIKORA and D. D. MACDONALD	783	A new method for estimating the diffusivities of vacancies in passive films
A. KOLICS and G. HORÁNYI	791	Some considerations about the applicability of the *in situ* radiotracer "foil" method for the study of accumulation processes on compact stainless steel electrodes—I. Measurement of β-radiation
WEN-FENG LIN and SHI-GANG SUN	803	*In situ* FTIRS investigations of surface processes of Rh electrode—novel observation of geminal adsorbates of carbon monoxide on Rh electrode in acid solution
M. A. BALDO, S. DANIELE and G. A. MAZZOCCHIN	811	Cyclic voltammetry at mercury microelectrodes. Effects of mercury thickness and scan rate
M. SÁNCHEZ-MAESTRE, R. RODRÍGUEZ-AMARO, E. MUÑOZ, J. J. RUIZ and L. CAMACHO	819	The cyclic voltammetric behaviour of 4,4′-bipyridine over mercury in an acid medium
SHIXIONG JIN and SIYU YE	827	Oxygen evolution on titanium anodes coated with conductive metallic oxides: Kinetics and mechanism in alkaline solution
J. J. GARCÍA-JAREÑO, J. NAVARRO-LABOULAIS and F. VICENTE	835	Charge transport in Prussian Blue films deposited on ITO electrodes

TAE-HYUN YANG and SU-IL PYUN	843	Hydrogen absorption and diffusion into and in palladium: *ac*-impedance analysis under impermeable boundary conditions
UN-SICK PARK, YOUNG-JIN HONG and SEUNG M. OH	849	Fluorescence spectroscopy for local viscosity measurements in polyacrylonitrile (PAN)-based polymer gel electrolytes
M. EGUCHI, A. KOMAMURA, T. MIURA and T. KISHI	857	Lithiation characteristics of $Cu_5V_2O_{10}$
S. KUDELKA, A. MICHAELIS and J. W. SCHULTZE	863	Effect of texture and formation rate on ionic and electronic properties of passive layers on Ti single crystals
R. ERIKSSON	871	A study of the PBD-technique using the copper refining cell as a model system
S. JAYASEKERA, J. AVRAAMIDES and I. M. RITCHIE	879	The electrochemical oxidation of gold telluride ($AuTe_2$) in perchloric acid solutions
XIN ZHAO, WENRUI JIN and YAN WANG	887	Investigations on bioanalytical chemistry—VII: Reaction mechanism of the Cu(II)–adenine system in Na_2HPO_4 + citric acid buffer
BAOXING WANG and SHAOJUN DONG	895	Electrochemical study of isopoly- and heteropoly-oxometallates film modified microelectrodes—VI. Preparation and redox properties of 12-molybdophosphoric acid and 12-molybdosilicic acid modified carbon fiber microelectrodes
M. ABRAHAM, M.-C. ABRAHAM and I. ZIOGAS	903	Activation parameters for the electrical conductivity of mixed nitrate–water systems, from fused salts to dilute solutions
F. NICOLAS, H. GROULT, D. DEVILLIERS and M. CHEMLA	911	Influence of bubble adherence on the kinetics of the fluorine evolution process
SU-IL PYUN and JOON-SUNG BAE	919	The *ac* impedance study of electrochemical lithium intercalation into porous vanadium oxide electrode
P. OLIVI, L. O. S. BULHÕES, J.-M. LÉGER, F. HAHN, B. BEDEN and C. LAMY	927	The electrooxidation of formaldehyde on Pt(100) and Pt(110) electrodes in perchloric acid solutions
Short Communications		
F. BECK, G. TOM SUDEN, U. TORMIN and T. BOINOWITZ	933	Thin inert bipolar electrodes fabricated from carbon black filled polypropylene
H. INOUE, S. ARAI and C. IWAKURA	937	Crystallographic and electrochemical characterization of $TiV_{4-x}Ni_x$ alloys for nickel–metal hydride batteries
K. SCOTT	941	*Electro-osmosis.* Edited by K. P. TIKKOMOLOUA
	943	Future Special Issues
	945	Papers in Press
	947	Electrochemical Calendar
	951	Books Received
		NUMBERS 7/8
	i	ISE pages
J. VEREECKEN	953	Editorial
PLENARY SESSION		
C. GABRIELLI and M. KEDDAM	957	Contribution of electrochemical impedance spectroscopy to the investigation of the electrochemical kinetics

W. P. Gomes and D. Vanmaekelbergh 967 Impedance spectroscopy at semiconductor electrodes: Review and recent developments

INSTRUMENTATION—DATA PROCESSING

P. T. Wojcik, P. Agarwal and M. E. Orazem 977 A method for maintaining a constant potential variation during galvanostatic regulation of electrochemical impedance measurements

A. S. Baranski and A. Szulborska 985 High frequency impedance measurements at ultramicroelectrodes

J. R. Dygas and M. W. Breiter 993 Measurements of large impedances in a wide temperature and frequency range

J. Fleig and J. Maier 1003 Finite element calculations of impedance effects at point contacts

J. Jamnik, J. Maier and S. Pejovnik 1011 A new penetration impedance technique

P. Agarwal, M. E. Orazem and L. H. Garcia-Rubio 1017 The influence of error structure on interpretation of impedance spectra

G. S. Popkirov 1023 Fast time-resolved electrochemical impedance spectroscopy for investigations under nonstationary conditions

ELECTROCHEMICAL KINETICS

R. Ichino, C. Cachet and R. Wiart 1031 Mechanism of zinc electrodeposition in acidic sulfate electrolytes containing Pb^{2+} ions

F. J. Fabri Miranda, O. E. Barcia, S. L. Diaz, O. R. Mattos and R. Wiart 1041 Electrodeposition of Zn–Ni alloys in sulfate electrolytes

D. Gonnissen, S. Vandeputte, A. Hubin and J. Vereecken 1051 Investigation of the mechanism of silver deposition from thiosulphate solutions by means of *ac* impedance measurements and surface-enhanced Raman spectroscopy

A. Nishikata, Y. Ichihara and T. Tsuru 1057 Electrochemical impedance spectroscopy of metals covered with a thin electrolyte layer

C. Rerolle and R. Wiart 1063 Kinetics of oxygen evolution on Pb and Pb–Ag anodes during zinc electrowinning

ORGANIC FILMS

P. L. Bonora, F. Deflorian and L. Fedrizzi 1073 Electrochemical impedance spectroscopy as a tool for investigating underpaint corrosion

F. Beck and U. A. Krüger 1083 EIS of cathodically deposited wet paint films prior to the stoving process

H. Katayama, K. Yagi, A. Nishikata and T. Tsuru 1093 Impedance characteristics of organic-coated stainless steels with a macroscopic defect

G. G. do Nascimento, J. L. C. dos Santos, I. C. P. Margarit and O. R. Mattos 1099 Lacquered tinplate: Corrosion resistance in the function of lacquering conditions

D. H. van der Weijde, E. P. M. van Westing and J. H. W. de Wit 1103 EIS measurements on artificial blisters in organic coatings

SURFACE TREATMENTS

J. H. W. de Wit and H. J. W. Lenderink 1111 Electrochemical impedance spectroscopy as a tool to obtain mechanistic information on the passive behaviour of aluminium

I. ANNERGREN, M. KEDDAM, H. TAKENOUTI and D. THIERRY 1121 Modelling of the passivation mechanism of Fe–Cr binary alloys from *ac* impedance and frequency resolved *rrde*—I. Behaviour of Fe–Cr alloys in 0.5 M H_2SO_4

M. GABERŠČEK and S. PEJOVNIK 1137 Impedance spectroscopy as a technique for studying the spontaneous passivation of metals in electrolytes

J. PAN, D. THIERRY and C. LEYGRAF 1143 Electrochemical impedance spectroscopy study of the passive oxide film on titanium for implant application

J. DE LAET, H. TERRYN and J. VEREECKEN 1155 The use of impedance spectroscopy and optical reflection spectroscopy to study modified aluminium surfaces

CORROSION

P. ALTOÉ, G. PIMENTA, C. F. MOULIN, S. L. DÍAZ and O. R. MATTOS 1165 Evaluation of oilfield corrosion inhibitors in CO_2 containing media: A kinetic study

M. BOJINOV, I. BETOVA and R. RAICHEFF 1173 A model for the transpassivity of molybdenum in acidic sulphate solutions based on *ac* impedance measurements

O. GEBHARDT and A. HERMANN 1181 Microscopic and electrochemical impedance spectroscopy analyses of Zircaloy oxide films formed in highly concentrated LiOH solution

HER-HSIUNG HUANG, WEN-TA TSAI and JU-TUNG LEE 1191 Electrochemical behavior of the simulated heat-affected zone of A516 carbon steel in H_2S solution

M. ITAGAKI, M. TAGAKI and K. WATANABE 1201 Active dissolution mechanisms of iron using EIS with channel flow double electrode. Influences of chloride and fluoride ions

L. GARRIGUES, N. PEBERE and F. DABOSI 1209 An investigation of the corrosion inhibition of pure aluminum in neutral and acidic chloride solutions

C. GABRIELLI, M. KEDDAM, F. MINOUFLET and H. PERROT 1217 *Ac* electrogravimetry contribution to the investigation of the anodic behaviour of iron in sulfuric medium

V. POULAIN, J.-P. PETITJEAN, E. DUMONT and B. DUGNOILLE 1223 Pretreatments and filiform corrosion resistance of cataphoretic painted aluminium characterization by EIS and spectroscopic ellipsometry

F. PRUCKNER, J. THEINER, J. ERI and G. E. NAUER 1233 *In-situ* monitoring of the efficiency of the cathodic protection of reinforced concrete by electrochemical impedance spectroscopy

A. A. SAGÜÉS, S. C. KRANC and E. I. MORENO 1239 Evaluation of electrochemical impedance with constant phase angle component from the galvanostatic step response of steel in concrete

T. ZAKROCZYMSKI and J. FLIS 1245 Impedance characterization of the activation of iron surface for hydrogen entry from alkaline solution

BATTERIES—SENSORS—MOLTEN—SALTS

M. ISHIKAWA, K.-Y. OTANI, M. MORITA and Y. MATSUDA 1253 Behavior of the interface between lithium electrodes and organic electrolyte solutions

V. MANCIER, A. MÉTROT and P. WILLMANN 1259 *Ac* impedance modelling of nickel hydroxide electrodes viewed as mixed protonic–electronic conductors

X. Y. XIONG, H. VANDER POORTEN and M. CRAPPE 1267 Impedance parameters of Ni/Cd batteries—individual electrode characteristics. Application to modelling and state of charge determinations

SEMICONDUCTORS—MODIFIED ELECTRODES

L. A. DA SILVA, V. A. ALVES, M. A. P. DA SILVA, S. TRASATTI and J. F. C. BOODTS 1279 Electrochemical impedance, SEM, EDX and voltammetric study of oxygen evolution on Ir + Ti + Pt ternary-oxide electrodes in alkaline solution

M. Dolata, P. Kedzierzawski and J. Augustynski 1287 Comparative impedance spectroscopy study of rutile and anatase TiO_2 film electrodes

S. S. Kocha and J. A. Turner 1295 Impedance analysis of surface modified $Ga_{0.5}In_{0.5}P$—Aqueous electrolyte interface

G. Barral, S. Maximovitch and F. Njanjo-eyoke 1305 Study of electrochemically formed $Ni(OH)_2$ layers by EIS

V. P. Parkhutik, E. S. Matveeva and R. Díaz Calleja 1313 Impedance study of aging porous silicon films

J. A. Prins-Jansen, G. A. J. M. Plevier, K. Hemmes and J. H. W. de Wit 1323 An *ac*-impedance study of dense and porous electrodes in molten-carbonate fuel cells

S. Sanchez, S. Cassaignon, J. Vedel and H. Gomez Meier 1331 Copper diffusion in solid copper sulfide electrode

POLYMERS—MEMBRANES

C. Deslouis, T. El Moustafid, M. M. Musiani and B. Tribollet 1343 Mixed ionic-electronic conduction of a conducting polymer film. *Ac* impedance study of polypyrrole

E. S. Matveeva, R. Díaz Calleja and V. P. Parkhutik 1351 Impedance study of chemically synthesized emeraldine form of polyaniline

G. Gusmano, A. Bianco, G. Montesperelli and E. Traversa 1359 An EIS study of the humidity-sensitive electrical conduction of alkali-doped TiO_2 films

E. Cordruwisch, G. S. Popkirov, E. Türk, J. Theiner and G. E. Nauer 1369 Redox behaviour of thin films of poly(thienylpyrrole) characterized by *in situ* measurement of high frequency resistance

M. A. Vorotyntsev, J. P. Badiali and E. Vieil 1375 Multi-component diffusion approach to transport across the electroactive-polymer films with two mobile charge carriers

NEW TRANSFER FUNCTIONS

O. E. Barcia, O. R. Mattos, N. Pébère and B. Tribollet 1385 Anodic dissolution of metals under mass transport control

E. L'Hostis, C. Deslouis, B. Tribollet and D. Festy 1393 EHD and steady state measurements for characterization of transport properties in a gel layer

1401 Future Special Issues

1403 Papers in Press
